Annual System Service Agreement

Now that your new landscape lighting system has been installed we would like to tell you about our continued customer service and support that we offer with our Annual System Service Agreement.

Just like with most appliances and electrical systems your lighting requires maintenance from time to time. If you're like many of our customers, your schedule does not allow the time to do the proper maintenance to keep your system looking as new as the day it was installed.

That is where we can step in and be of assistance to you and your lighting needs once again. [Landscape Lighting Resources](#) has designed an Annual System Service Agreement to properly service and maintain your system.

With the Annual System Service Agreement you will receive the following:

- All fixtures will be cleaned and inspected.
- Path lights cleaned and treated to restore finish.
- Lenses on spots cleaned and / or replaced if clouded over by irrigation overspray.
- Transformer fully inspected.
- All wiring and connections inspected.
- Shrubs and plants intruding on fixtures trimmed.
- Fixtures repositioned if needed.
- Timer systems with digital timer programs checked and a fresh back up battery installed.

The cost of the Annual System Service Agreement is a base price of \$75 plus \$5 per fixture.

If you sign up and pay for your first Annual System Service Agreement within 30 days of your initial installation we will discount your first service 30%. This is not a contract, which means you are not locked in to 3, 5 or 10 years, it's simply based on a year to year decision whether you want the service.

To take advantage of this service, please email april.sanders@landscapelightingresources.com.
